

SCREENEZE® SPECIFICATIONS**COMPONENTS:****Aluminum Base Channel**

- Solid aluminum alloy
- Temper: T5
- Finish: Baked on polyester paint

PVC Vinyl Cap

- Window grade virgin vinyl

Screw

- Steel with Stalgard® Corrosion Resistant Finish specifically designed for use with ACQ treated lumber
- ¼" nut drive with 1 ¼" self tapping thread
- Color coordinated

CONDITIONS:**Expansion and Contraction**

- As with all materials, SCREENEZE® expands and contracts. Our Aluminum Base Channel creates a solid base so as expansion and contraction occur it doesn't cause the screen to loosen and sag. When installing your system plan for the temperature change your porch endures. Full sun, part sun or no sun; adjust your cuts for the day you are installing SCREENEZE®. Hot day, full sun make snug fits. Cool day, no sun leave a 1/16" – 1/8" at the corners.
